Quadruple Your Money in the INTERNET APOCALYPSE OF 2001!

URGENT PRESS-TIME UPDATE:

NEW Internet Bloodbath Ahead!

The two tech wrecks of 2000 were brutal. But they were little more than dress rehearsals for the main event:

A cataclysmic crash in Internet and other tech stocks that will drive the Nasdaq below 2,000 for the first time since 1998!

Here's why a bloodbath is now inevitable in 2001 ... and why it is absolutely imperative that you take the defensive steps I recommend in this bulletin now...

... PLUS four ingenious ways to make more money on the Internet BUST of 2001 than you did in the boom of 1995-2000!

Dear Soon-To-Be-Richer Investor:

Last year, you would probably have scoffed at anyone who told you that Internet stocks were about to crash—not once, but twice.

Well, "someone" did: Me.

My name is Martin D. Weiss, Ph.D.

Arizona woman saved from nursing home by natural breakthrough for "failing memory!"

How would you feel if your spouse was in the nursing home, only he/she didn't know your name or remember where you lived? It'd be crushing.

That's how Delroe T. of Arizona felt as he cared for this beloved wife.

She wasn't getting any better, so Delroe took her <u>out</u> of the nursing home and began giving her 400 mgs a day of a remarkable natural breakthrough for agerelated memory decline.

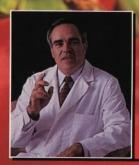

What happened next could only be called a "miracle!"

Delroe reports: "After three months of taking [this nutrient], my wife was able to answer the telephone and talk to relatives. Even better, I have her back in my daily company. We can discuss our wonderful years together."

What could this amazing discovery do for your mind and memory? *Just take a look...*

Myths, Lies, and Medicine

Fearless medical insiders blow the lid off...

BIG, HIDDEN DANGERS! RISKY, OUTDATED TREATMENTS!

AND HUNDREDS OF HUSHED-UP NEW CURES!

an you really expect all those who make money from our illnesses to always have our best interests at heart? After all, when we get better, they stop making money!

Treating our pain and suffering has become a *trillion*-dollar-a-year business—one that too often puts profits before patients.

No wonder there's so much misinformation and out-and-out lies out there! No wonder drug companies cover up deadly side effects! No wonder experts say that *millions* of unnecessary surgeries are performed every year—while safer, more effective medical options and natural alternatives are ignored!

Getting well is the best revenge!

But now a courageous band of outspoken medical insiders has come forward to set the record straight.

Risking ridicule and legal action, these leading doctors, nurses, researchers, and others on the medical front lines expose the lies...show you how to protect yourself...and reveal the truths that can put an end to your pain and suffering once and for all.

3 Dire Warnings Fall on Deaf Ears!

Q: What do RONALD REAGAN's favorite economic advisor, BILL CLINTON's Treasury Secretary, TODAY'S U.S. Comptroller General and the IMF all have in common?

A: They have just warned that ...

- Washington's massive deficits are a NATIONAL DISASTER.
- The only way to avert disaster would be with tax increases AND budget cuts that are INFEASIBLE.
- Result: Washington's deficits could destroy the dollar, drive interest rates higher, crash stock markets and threaten the economy of the entire world.

March 29, 2004 URGENT SPECIAL ALERT

Dear Fellow Investor:

The U.S. Comptroller General, the former U.S. Secretary of the Treasury and the International Monetary Fund have just issued THREE DIRE WARNINGS:

- * That America's massive budget deficits are out of control
- * That these deficits could hammer the U.S. dollar, the U.S. bond market and the U.S. stock market
- * And that they could threaten the economy of the ENTIRE world.

See for yourself ...

DIRE WARNING NUMBER ONE:

The alternatives to the budget disaster are "INFEASIBLE"

— The U.S. Comptroller General David M. Walker, the Comptrol-

ler General of the United States has recently warned that ...

>> Government accountants are hiding massive amounts of debt, making it impossible to know how big Washington's deficits and debt really are.

>> The difference between the debt Washington admits to and its REAL debts are in the TRILLIONS OF DOLLARS: His exact words: "These additional amounts total tens of trillions of dollars in discounted present value terms ... they are likely to exceed \$100,000 in additional burden for every man, woman and child in America today, and these amounts are growing every day."

>> The actions that could help us avert a budgetary disaster are INFEASIBLE: The only solution would have to include:

- "raising taxes to levels far in excess of what the American people have ever supported before,
- "cutting total federal spending by unthinkable amounts, or
- "further mortgaging the future of our children and grandchildren to an extent that our economy, our competitive posture and the quality of life for Americans would be seriously threatened ..."

DIRE WARNING NUMBER TWO:

U.S. Budget Deficits risk CRASHING U.S. stock, Treasury and bond markets!

- Former Treasury Secretary Rubin et al

Dear Independent Investor,

The great J.P. Morgan had two telephones on his desk: one was connected directly to the chairman of U.S. Steel...and the other linked J.P. directly to his most valued clients.

Legend has it that when Morgan had finished extracting a new piece of information from his friend at U.S. Steel on one phone...he quickly dialed out on the other to advise his clients to buy (or sell) the stock.

Those two telephones alone made the house of J.P. Morgan the center of the investing universe back in the 1920's. What Morgan was trading was information. Information of an extremely high "grade." Some might call this information "inside," but that only tells you about its source. Another word for it on Wall Street—

15 New Assaults on Your Health & Wealth in 2005

The <u>Hidden</u> Bull Market Wall Street Hopes to Keep Under Wraps

"Why the coming Energy Shock, ripped out of today's headlines, is making new millionaires—even as 'popular' investments go down the tubes."

Today, a handful of investors are growing filthy rich in a hidden bull market. (Hint: You're stimulating it every time you fill your car up with gas, heat your house or buy a piece of plywood.)

The real news is, it's still not too late for you to get on board, make up for lost profits, and grow rich, as you'll see on page 5.

But slick stockbrokers and financial planners hope you never catch wind of this <u>hidden</u> bull market. They want you to keeping buying their stocks and mutual funds (and making their commissions)—adding to the seven trillion dollars lost on Wall Street since 1991.

This Wall Street rip off is just one example of more than a dozen new assaults on your health and wealth I'll reveal in this special issue. You'll discover how big financial institutions, the big medical establishment, and big government plan to keep you under their thumbs and deep in your bankbook.

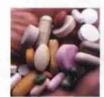

But it's time to say, "enough is enough" and declare your health and wealth independence. It's easy—you just need two things, and you probably already have the first one...

few months ago, President Clinton said four little words that have the power to bring an economic disaster upon your family and America.

At first glance, those four words seemed harmless enough, but when put into action, they have always destroyed dreams . . . torn down businesses . . . caused lifelong careers to evaporate overnight . . . and driven American families to the brink of disaster.

Moreover, those four little words have the power to enslave a generation of our children in a hopeless cycle of poverty and increasing dependence on government.

That threat, my friend, is embodied in four little words President Clinton said in his address to Congress:

Dear Fellow Investor:

The marathon bull market is headed for "heartbreak hill" in 1997 (possibly as soon as *April*). Wall Street's "smart money" is looking for a 15%-25% decline from today's lofty levels. You could be staring at a DOW of 5500 within 60 days.

Investors caught in the *wrong* companies will see one or two years' profits *evaporate* almost overnight. *Rookie mutual fund investors* will be hardest hit as panic selling drives prices off the cliff. Highflying funds will drop 25% to 40% or *more*.

And amidst all the clamor and fuss, a select circle of legendary investors will sit back, smile and quietly move in for the bargains of the century.

Who are these legends? None other than Warren Buffett, Peter Lynch, John Templeton, George Soros, Martin Zweig and company.

For nearly *half a century*, these giants have earned astronomical profits through every market crash, correction, recession and decline. They've watched as *others* panicked. They've profited from all the hype and hysteria. And

Think CANADA Is the United States' #1 Ally? Think Again...

BACKSTABBED!

Right now, booming, oil-hungry China's making deals that will cut U.S. crude supplies off at the knees — contracting for billions of barrels of oil from the same sources Uncle Sam's counting on as alternatives to the Middle East...

Including a mammoth hidden oil reserve that's right next door — IN "FRIENDLY" CANADA.

And on or about March 15, 2005, a contract will be signed between China and Canada that'll change America's oil outlook forever. Get in NOW, and you'll be able to afford the \$5-a-gallon gas that's coming—along with a Benz or two to burn it in...

But while most commodities investors will be bailing out of their energy positions, you can cash in — by buying grossly undervalued stock in the ready-to-explode resource giants that 99% of American investors overlook.

A lucky few are already "mining" these under-the-radar stocks for gains of 151%, 174%, 249% — even 270% or more. Over the long haul, profits of over 3,000% would not be unrealistic.

To GET RICH as the United States runs dry of oil, turn the page...

SOLVE THE STIFFNESS OF AGING-

By Balancing Body Chemistry

Our creator endowed us with balanced body chemistry, which if properly maintained, provides us with a long, healthy life.

Unfortunately, doctors pay little or no attention to balancing body chemistry. If they did, it would unbalance their pocketbooks, because the more we stay in acid/alkaline balance, the healthier we are and the longer we live.

The exciting thing is that we can control our acid/alkaline pH balance extremely easily. We can test ourselves and modify our body chemistry as needed absolutely without risk.

A healthy man, woman or child is in acid/alkaline pH balance, slightly in favor of alkalinity. If we are too acid, we are unhealthy. It is this simple! And if we get totally acid, we are dead!

Dr. George W. Crile, a great surgeon, said, "There is no such thing as natural death. All deaths from so-called natural causes are merely the endpoint of progressive acid saturation."

Any form of poor health indicates a disturbed state of body chemistry balance — generally an acid state.

In fact, over-acidity is common to

all health-robbing conditions. An infant is highly alkaline. An 80-year-old person is highly acid. Death is 100% acidity.

Causes of Acidity

The relationship between acid and alkaline is scientifically quantified on a scale of 0 to 14 known as pH. On this scale, 7 is neutral. Below 7 is acid and above 7 is alkaline. The ideal range is between 7.35 and 7.45 with most of us falling in the acid range of 6.2 to 6.4.

Why are we a full point or more below the ideal alkaline range? Three big reasons: Stress, diet and dehydration. If you live and work in America you're swamped in stress and stress is a BIG cause of increased acid production. As we age we become more acid because we build up more acid waste. A poor diet is the principle cause. You're probably eating 80% acid foods and only 20% alkaline foods, when just the opposite ratio is the one that will help you stay healthy.

Commercially processed foods are very acid and most people live on processed foods. Beef, pork, fish, turkey, chicken, pasta, hamburgers,

In the next 59 Minutes, 100 Americans will suffer a devastating BLOCKAGE of blood flow to the heart or brain ...

... And for half of them, their sudden death will be the doctors' FIRST and ONLY clue that they were at risk.

Now, top scientists at Harvard and a major British medical research institute have found the culprit that kills up to 438,000 people with healthy arteries each year — and have placed astonishing NEW life-saving, health-giving power into your hands!

For decades now, scientists have struggled with a great mystery: They knew that half of all deadly blockages of blood flow to the heart and brain strike people with cholesterol-clogged arteries.

But that only explains half of the 872,000 heart and brain deaths that occur in the U.S. each year. According to the March 23, 2005 issue of the New England Journal of Medicine, the "other" half — about 438,000 victims per year — do not suffer from high cholesterol ... do not

How much are you at risk?

Death by Doctors

The biggest danger to your health isn't a killer disease.

The biggest threat to your health is "the system" itself—run by greedy doctors who'll soak

you of your hard-earned money to line their own pockets—even if it destroys your health.

If you think I'm exaggerating, here's an untold story that'll get your blood boiling...

Who's more dangerous to your health: doctors or gun owners?

There are 700,000 physicians in the U.S., and every year they cause 120,000 accidental deaths. That's a doctor/death ratio of just over 17 percent.

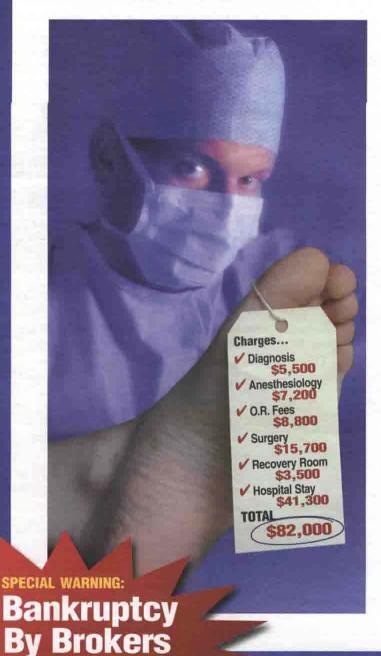

There are 80,000,000 gun owners in America, and every year they cause 1,500 accidental deaths. That's a gun owner/death ratio of .00188 percent.

Bottom line: You're **9,000 times** more likely to be killed by a doctor than a gun owner!

MARTIN D. WEISS, Ph.D. — widely known as "The Conscience of Wall Street" — who led his clients to <u>profits of up to 929%</u> when the market crashed, issues the most urgent exposé of his 30-year career:

Famous 'gurus' at Merrill Lynch, Salomon, Morgan Stanley, and a dozen other major Wall Street firms were ...

DIRTY ROTTEN LIARSI

They LIED when they swore that WorldCom, Enron, Global Crossing, Priceline.com, and a hundred other Wall Street darlings would make you rich. Now, I firmly believe they're LYING to you again!

- Here's why the new bull market they're promising is nothing more than a cunning TEN TRILLION DOLLAR TRAP ...
- ... PLUS what you MUST DO NOW Within the next 10 days to SAVE YOUR WEALTH and amass up to 929% profits!

Disaster in the Dow!

"General Motors, Fannie Mae, and 21 other major U.S. corporations are likely to collapse as interest rates rise.

"The consequences will be enormously far-reaching. Millions of investors, who depend on these companies for their stock values and retirement income, will take shattering losses.

"Surprisingly, there are also huge profits to be made from the fallout. Here are five simple ways to lock them in for yourself."

> — Martin D. Weiss, Editor Safe Money Report

Dear Investor,

General Motors has just announced its worst quarterly loss since the company narrowly skirted financial collapse 13 years ago.

The situation is so uncertain that the company has failed to provide Wall Street analysts with the customary forecast of future earnings. For every car they sell, they lose \$2,700. For every \$1 of cash they have left, they owe over \$13. Jeepers, what a disaster!

General Motors' finances are so bad, their bonds have just been downgraded to junk. The Chief Financial Officer even says he's going to have to raid the company's health care fund for desperately needed cash. And some investors are still offering to buy their stock? This is insane!

They're already talking about closing down multiple plants around the country to eliminate tens of thousands of jobs. But even that won't save them because the laid-off workers will continue to get a portion of their paychecks plus generous health care benefits that are guaranteed under labor contracts.

Meanwhile, General Motors is quickly losing market share. They're having such difficulty selling their cars that about a third of their

GOLD & ENERGY ADVISOR

Fall 2006

The Man With The GOLDEN Touch

A millionaire at 17, James DiGeorgia reveals why his Gold & Energy Advisor portfolio is up almost 94%...and how a "golden tidal wave" will make you rich.

Nearly three years ago, James DiGeorgia, Editor of Gold & Energy Advisor, wrote: "Gold is heading to \$1,000 an ounce. If you don't hedge your real estate, stock and bond investments with gold, you're asking for real financial trouble and missing a great opportunity."

Gold's price then: \$380. Gold's price as I write: \$572.

When James made his prediction for \$1,000 gold, he touched off a firestorm. Some said he'd taken leave of his senses. Wall Street experts looked at the numbers and shook their heads.

Not any more.

Today, a nervous world (and stock market) is ONE major terror strike away from a massive oil disruption that could jack up the price of oil to \$150 a barrel overnight. And you think \$70 oil made gold jump! But that's just one reason why James sees \$1,000 gold in the near future.

Bottom line: There is no one better qualified than James DiGeorgia to show you how to leverage the coming inflation and bull markets in oil and energy into a fortune.

A little proof? Fair enough, Since

By James DiGeorgia Editor, Gold and Energy Advisor

his article is about onrushing events I don't even like to think about. But unavoidable truths do not simply go away because we don't like them.

So, brace yourself please. I am going tell you three truths that most financial advisors, and even our own President, cannot muster the intestinal fortitude to whisper.

#1: We are getting closer every day to a truly devastating, worldwide oil shock than most people realize. Expect minimums of \$100-a-barrel oil and \$750-an-ounce gold by the end of next year.

UNAVOIDABLE TRUTH

#2: The conflicts in Afghanistan and Iraq – as much as they horrify us all – must be viewed as merely the first minor skirmishes in a long, dangerous, global war for oil.

#3: This war (or more likely wars) will dominate the coming two decades and impact your financial future like nothing else in your lifetime.

I realize these are terrible, frightening things to contemplate. After all, I have children of my own and look forward to grandchildren someday. Like you, I want them to live in a world where as many people as possible enjoy peace and prosperity.

But what I want and what I know are two very different things.

That's why I say this to you – for the sake of your financial future and your family, you must look at the world the

- >> Four critical steps you MUST take NOW to insulate your wealth from the great federal debt EXPLOSION of 2004-2005, and...
- Investments that can soar as much as 562% and potentially MAKE YOU UP TO SIX TIMES RICHER as Washington accelerates the greatest spending spree in history!

Dear fellow investor:

It's no secret that our government is bleeding the greatest gusher of red ink in history. And no institution on Earth — not the White House, not Congress ... not the Treasury or Federal Reserve — has the faintest hope of slowing it — let alone STOPPING it.

Despite what politicians of both parties may try to tell you, the undeniable truth is that Washington, D.C. has LOST CONTROL of the federal budget.

By conservative estimates, the budget deficit will top \$500 billion in 2004. But that number is based on the kind of phony-baloney accounting tricks only the U.S. government can get away with. If you use the kind of accounting rules you and I are required to use — the REAL deficit is going to be more. Much, MUCH more!

Since 1988, the average gain on stocks sold each year using this revolutionary strategy has been an astonishing 45.1%

by Robert S. King, President, Phillips Publishing, Inc.

Billionaire J. Paul Getty once said: "If you want to get rich, just find someone making lots of money and do what he's doing."

This is exactly what Dan Bruce does for you.

First, he uncovers what today's foremost investors are doing. Then he rigorously evaluates their very best picks for safety and growth potential. Finally, in his monthly advisory letter, *Invest With The Masters*, he reveals how to put *the best of the best* to work for you in your own master-inspired, high-performance portfolio.

Many say he has created the world's safest and most profitable investment strategy.

Skeptical? I was, too, at first. So let me give you the facts and you can decide for yourself.

Fact #1 – Since *Invest With The Masters* was founded in 1988, the average gain of the stocks sold each year has been an astounding 45.1%. Imagine what that would have meant for *your* returns over the past eight years!

Fact #2 – Current success stories include Lidak
Pharmaceuticals (up 125% in 1995), Microtel (up 94% in just seven

AN URGENT ALERT from Martin D. Weiss, Ph.D. — who warned about Enron MONTHS in advance, and is leading his clients to profits of up to 929% even in today's treacherous investment environment:

Has Greenspan Cone NUTS?

Fed Chief Alan Greenspan's interest rate hikes helped crush the US economy and slaughter the great bull market.

Now, he claims the worst is over, and he's planning to RAISE interest rates — AGAIN!

Has he lost his ever-lovin' MIND?

Inside: The unvarnished truth Greenspan is too blind to see: How more than 1,359 new "WorldComs" and "Enrons" are poised to crash the market at any moment.

PLUS: How YOU can USE this privileged information to grow up to TEN TIMES RICHER in 2002 - 2003!

Here's what you must do NOW — WITHIN THE NEXT 10 DAYS — to keep what's left of your wealth intact AND to join us in profits of up to 929% and MORE as these companies fail!

Dear Embattled Investor:

You are now standing at the most crucial crossroads of your entire investing lifetime.

Twelve months from now, you can either be crying -- or laughing all the way to the bank. The choice is in your hands.

We are now witnessing the beginning of the most catastrophic wave of bankruptcies to slam US businesses in more than 70 years.

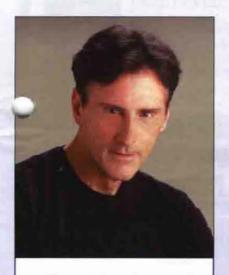

You already know that Enron, the 7th largest US company in revenues, has gone belly-up. It was the worst corporate disaster in US history -- until WorldCom bit the dust just months later! Combined, they had revenues of \$209 billion, and assets of \$157.4 billion. Enron's stock collapsed from \$90 to a hair short of a BIG FAT ZERO. WorldCom's stock fell from \$60 -- wiping out more than \$244 billion in invested capital and nearly EVERY PENNY invested by 122,920 investors.

Hidden Cause of Deadly Diseases that Your Doctor Won't Tell You

Tests said "normal," but his blood was "toxic"

By Stephen Sinatra, M.D. Editor-in-Chief, and one of America's most trusted cardiologists

Did you know that...

- in 40 percent of all cases, the *first* sign of a heart problem is sudden cardiac death?
- as many as 80 percent of all heart attack victims have no typical risk factors?
- recent autopsy data demonstrates that coronary heart disease begins as early as age 15?
- victims' blood vessels are not blocked in as many as two-thirds of all fatal heart attacks?

How is this possible? Medical research now shows there is a new, deadly disease that can trigger an unexpected heart attack, or send your blood pressure and cholesterol soaring, drain you of energy, and even lead to impotence.

Shockingly, it's something that over 90 percent of doctors completely miss. I call it the "Toxic...

Amazing Nutrient Drenches the Body With Energy

Special to the Journal

Here's a common problem facing people over 50: Fatigue and tiredness cause them have to limit or even stop their favorite activities, such as golf, gardening, travel, or even sex.

The truth is feeling tired and older than your age is not natural and it's not inevitable. You don't have to be tired or run-down!

Now, science has uncovered a new natural breakthrough that not only ignites your energy—it gives you an unexpected benefit: a more pleasurable love life!

Blood Pressure

May make dangerous blood pressure medications obsolete

MANCHESTER, CT—Nothing gives me greater joy as a doctor than helping my patients solve big health problems—such as high blood pressure—and cut down or eliminate their dependence on dangerous prescription drugs at the same time.

Just take a look at a letter that I recently received from a woman named Libby:

"Dr. Sinatra, I have multiple medical problems, and I am on a lot of medications. One of the biggest problems is fatigue and my blood pressure staying high. But after following your recommendation for six weeks, my blood pressure is lower than it has been in several years.

Natural discoveries can lower dangerously high blood pressure.

Thank you so much."

How much did Libby's blood pressure improve? It fell from a dangerous 150/110 to an optimal 110/82. Across the board, that's a 34 percent improvement without drugs!

While Libby's results are promising, now here comes something NAMED INSIDE that gives you even *better* and *faster* results—and to the surprise of many, it's found in the ocean.

The BANK BUST Of 2003-2004

Just when you thought it might be safe to get back into the market again, your stocks and equity mutual funds will be SMASHED by one of the deadliest banking crises since 1932!

- Bank Failure Bust Ahead: U.S. bank failures have DOUBLED, loan defaults have SOARED, and now, TRILLIONS of dollars worth of investments that Warren Buffett calls "financial weapons of mass destruction" are poised to explode in bankers' faces!
- Urgent Self-Defense: What you MUST do IMMEDIATELY to insulate what's left of your savings, your investments and your retirement nest egg from the coming bank bust.
- Truly Enormous Profit Opportunities: The handful of little-known, seldom-used investments that will DOUBLE ... TRIPLE ... even QUADRUPLE when the shock waves of bank failures hit Wall Street!

Dear Investor,

The most cataclysmic destruction of personal wealth in our lifetime — a monster banking bust — is now a real threat for the first time in 71 years.

J.P. Morgan Chase's stock plunged from \$39.68 a share to a low of \$15.26 per share. Precisely 61.5% of the bank's market value — \$48 billion — was wiped out.

That's more than the total market value of Wachovia Bank ... and more than the combined total losses investors suffered in the bankruptcy of Adelphia Communications, Kmart and Polaroid! All in one bank! All in just 145 days!

Hard to believe, isn't it? J.P. Morgan Chase
— the second-largest bank in the United States
... with \$742 billion in total assets ... 900
branches ... over 30 million retail customers!
And there it was, losing nearly two-thirds of its total market value in less than five months!

This kind of cataclysmic collapse isn't supposed to happen to stodgy, staid boring banks! But it DID happen – and not just to J.P. Morgan, either!

From the beginning of 2002 to the most recent trough, Morgan Stanley lost a staggering 52% of its total market value — or \$34 billion

STOP LOSING MONEY and START GROWING RICH again:

The next time your broker calls with a hot stock tip, tell him ...

"It's a BEAR MARKET Stupid!"

Dear Beleaguered Investor ...

■ In 1999, I warned you that TECH STOCKS were about to crash and I urged you to take profits immediately ...

■ In 2000, I warned you that BLUE CHIPS were about to be hammered by earnings scandals and urged you to CASH OUT of Enron, WorldCom and a dozen other losers six months before they crashed ...

■ In 2001, I warned you that brokerage scandals would continue slamming stocks — long before swindles at Merrill Lynch, Salomon Smith Barney and the rest hit the headlines ...

Meanwhile — as stock after stock fell during three long years of terrible markets — I led my clients to investments that DOUBLED ... TRIPLED ... and even SOARED up to 307%.

Now, in 2003, the worst panic of all is about to impact the U.S. economy and stock markets.

Please — for your own sake: Do NOT ignore THIS final warning!

Martin D. Weiss, Ph.D. insulated his clients' money from the tech wreck of 2000 ... the earnings scandals of 2001 ... the brokerage outrages of 2002 ... and guided them to investments that soared 99% ... 144% ... up to 307% in the last year.

Live to 100 (or longer) and feel like 40 for the rest of your life thanks to these fantastic new anti-aging discoveries. No more brain-drain. No more saggy body. No more energy crisis. No burdening

others in your golden years.

It's all possible NOW!

Here's the amazing story. . .

by Stephen Sinatra M.D.

elly Nelson (shown on right) is "pushing 40" at the honest-to-goodness age of 72. She's got the body of a 35-year-old... the squeaky clean arteries of a woman closer to 25... and her bone density belongs to a woman half her age.

And can you believe that Bob Delmonteque (see back cover) is 81? You'd never know it by looking at him! What 40-year-old wouldn't love to have Bob's outstanding muscle tone and skin quality!

What's their secret? Do Kelly and Bob simply have exceptional genes? Not at all. Heredity actually plays a minor role in how you age and how long you live. Doctors now say that how you take care of yourself is far more important. And this puts the power squarely in your hands. In this Special Issue you'll read about the fantastic new anti-aging breakthroughs that can slow down your aging clock and restore your youthfulness.

Feel 40 Forever!

Exciting? You bet! You are about to discover why anti-aging is the hottest new field of medicine today. Our knowledge of the aging process is doubling every 5 years. Computers are running full-blast 24 hours a day. Incredible new advances are being made week-by-week. Mankind's oldest dreams of long, long life and eternal youth are about to come true in your lifetime! The only question is: "Will you keep up—or be left behind?"

No other branch of medicine offers you such precious rewards: Extra life.

Longer youth. And better health to enjoy it all in. And if you'd like to get in on
the ground floor of all the action—just turn this page for a sneak preview of how
you can benefit from these new discoveries right away!

(See OUTSMART FATHER TIME, page 3)

She's "39" at 72!

Kelly Nelson's driver license says she's 72. But her medical bio-markers of aging show she's closer to 39. Even more amazing: She'll probably live to 100—or longer—yet she'll test as a healthy 40- or 50-year-old! What about you? Are you ready to discover how to live longer and stay younger than you've ever dreamed possible? This Special issue can show you how!

Your Mount Mext Mount Mext Mount Mou

For just a moment, let's leave the economic second guessing and political prognostications to the TV news personalities and *Wall Street Journal* columnists...

...and instead let's talk about <u>you</u>. About <u>your</u> next investment decision. And about how it can be one of <u>your best ever</u>.

When you look back in a few months, sitting on profits of 100% or more, you'll be able to celebrate an investment decision that was made without consideration of the Dow being down 161 points today (or up 97 tomorrow). And you'll realize that (even if just for a few moments) you were able to simply ignore Alan Greenspan's monetary policy and the bickering politics of Campaign '96.

The result? While most investors were mired in paralysis, you joined a select few who were able to soar to new heights of investing success. The wonderful grin you'll be wearing will be the result of having just thrashed the market...and doubling your money on a single, glorious investment.

Think it can't be done in today's market? Well let me tell you, not only can it be done, but it is being done... consistently.

Being done by people with names like Buffett, Lynch and Templeton. Being done with a regularity that virtually defies explanation.

And now *you* can share in this consistent success. All it takes is a sincere desire to make money like these true superstars of investing. And a willingness to listen closely when

Hidden Cause of Deadly Diseases that Your Doctor Won't Tell You

Tests said "normal," but his blood was "toxic"

By Stephen Sinatra, M.D. Editor-in-Chief, and one of America's most trusted cardiologists

Did you know that...

- in 40 percent of all cases, the *first* sign of a heart problem is sudden cardiac death?
- as many as 80 percent of all heart attack victims have no typical risk factors?
- recent autopsy data demonstrates that coronary heart disease begins as early as age 15?
- victims' blood vessels are not blocked in as many as two-thirds of all fatal heart attacks?

How is this possible? Medical research now shows there is a new, deadly disease that can trigger an unexpected heart attack, or send your blood pressure and cholesterol soaring, drain you of energy, and even lead to impotence.

Shockingly, it's something that over 90 percent of doctors completely miss. I call it the "Toxic...

Blood Pressure

May make dangerous blood pressure medications obsolete MANCHESTER, CT—Nothing

MANCHESTER, CT—Nothing gives me greater joy as a doctor than helping my patients solve big health problems—such as high blood pressure—and cut down or eliminate their dependence on dangerous prescription drugs at the same time.

Just take a look at a letter that I recently received from a woman named Libby:

"Dr. Sinatra, I have multiple medical problems, and I am on a lot of medications. One of the biggest problems is fatigue and my blood pressure staying high. But after following your recommendation for six weeks, my blood pressure is lower than it has been in several years.

Natural discoveries can lower dangerously high blood pressure.

Thank you so much."

How much did Libby's blood pressure improve? It fell from a dangerous 150/110 to an optimal 110/82. Across the board, that's a 34 percent improvement without drugs!

While Libby's results are promising, now here comes something NAMED INSIDE that gives you even better and faster results—and to the surprise of many, it's found in the ocean.

(Discover more on page 2) STN3272/A A severe natural gas crisis is already a monkey on the back of oil and gas producers. On top of that, outdated technology is silently causing them to lose BILLIONS and BILLIONS in revenues.

"But one NEW TECHNOLOGY used by Exxon, Esso and ConocoPhillips may have the power to recapture those lost revenues.

It could make investors like you rich!

"Let me tell you about this revolutionary technology and prove how it could single-handedly revolutionize the gas and oil industry.

Windfall gains as high as 400% in just 12–18 months for investors might be possible for those who get in now!"

Dear Investor,

We are living with THE WORST natural gas shortage in three decades, which has caused prices to rise astronomically. This puts tremendous pressure on industries and businesses that use natural gas to power their plants or run their production lines as well as consumers everywhere who use natural gas to heat their homes.

From January 2000 to September 2003, the price of U.S. residential gas prices boomed \$7.39 Mcf to \$12.53 Mcf—that's an increase of approximately 70%.

The odd thing is, the natural gas is there. The producers just can't get it out because of the severe inadequacies existing in outdated technology. And that's just one problem for the oil and gas companies. Producers are losing money hand over fist as revenues vanish into thin air due to that very same radically ineffective and outdated technology.

Last year alone, gas companies supplied approximately \$110 billion worth of gas to the market. Assuming the gas measurements are off anywhere between 1% and 3%, that equals a monumental revenue loss of as much as—or more than—\$3 billion a year!

All of this is about to change with

WELLNESS STRATEGIES FROM THE WORLD'S LEADING MEDICAL EXPERTS

Nobel Prize Winner's Breakthrough Prevents Heart Attack and Stroke, Relieves Impotence

By Michelle Jones, Editorial Director

ake no mistake about it: As an American over 40, you have a 50% chance of having a heart attack or stroke one day. That's right, a 1-in-2 chance!

But here's great news: Thanks to a new discovery, you can keep your heart healthy, your arteries clear, and your blood pumping powerfully through your body.

This discovery is so important and so revolutionary that it won the Nobel Prize in medicine. But you may be surprised to learn that the discovery does NOT involve any drugs, surgery, or high-tech procedures. Instead, it involves a natural chemical that's produced by your own body.

The chemical is called *nitric* oxide, and it helps prevent heart attack and stroke 4 ways:

- 1. It lowers cholesterol by 10% to 20%. In fact, one study found that ...
- 2. It reduces arterial plaque by as much as 50%.
- It expands blood vessels, reducing blood pressure and

allowing blood to flow more freely.

 It controls platelet function, so they don't clump together and cause blood clots.

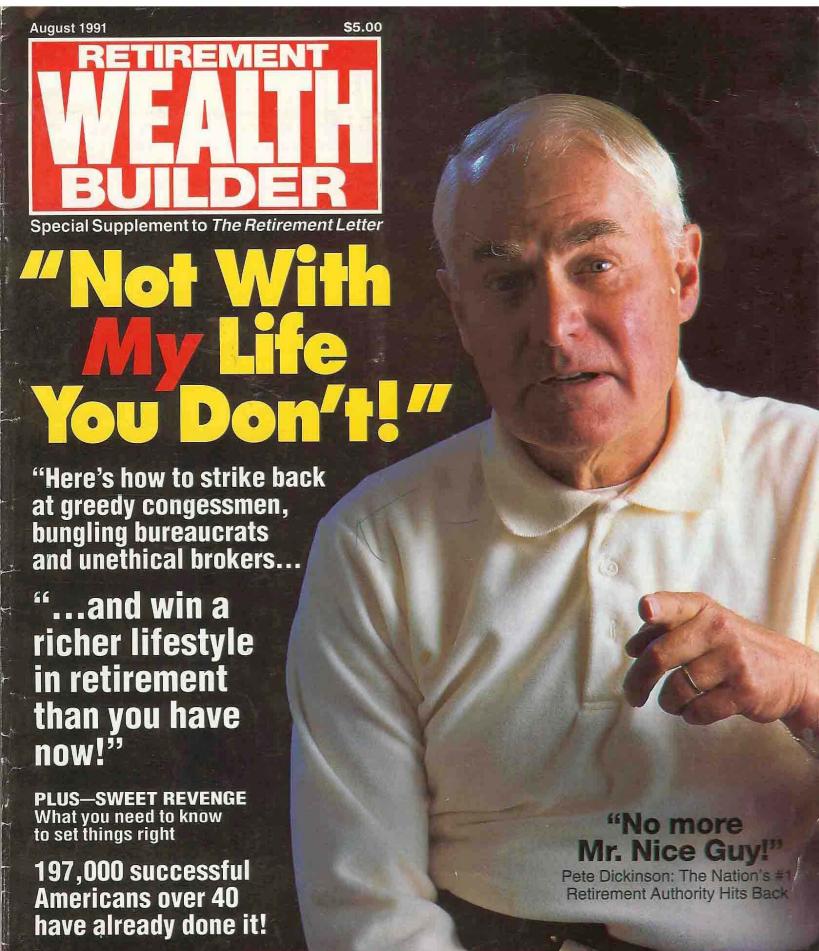

Together, these 4 actions can dramatically reduce your risk of heart disease and stroke. But that's not all. By opening blood vessels and increasing blood flow, nitric oxide can also relieve impotence. In fact, several popular impotence drugs work by increasing nitric oxide.

So how do you increase nitric oxide levels in the blood? By taking 2 nutritional supplements available at any health food store.

The first supplement is an amino acid called *L-arginine*. Several studies show that L-arginine has a positive effect on blood flow and on the inner lining of blood vessels. But here's the key: L-arginine doesn't enter the cells of the body easily unless it is combined with another amino acid called *L-citrulline*.

L-arginine and L-citrulline have

An urgent alert from Martin D. Weiss, Ph.D. —

PANIC IN THE WHITE HOUSE!

Question: What scared President Bush into proposing one

of the costliest stimulus plans in history?

Answer: Seven ticking time bombs that are about to shatter the economy in 2003!

YOU MUST READ THIS!

■ In 1999, I warned you that TECH STOCKS were about to crash and I urged you to take profits immediately ...

■ In 2000, I warned you that BLUE CHIPS were about to be hammered by earnings scandals and urged you to CASH OUT of Enron, WorldCom and a dozen other losers six months before they crashed ...

■ In 2001, I warned you that brokerage scandals would continue slamming stocks — long before swindles at Merrill Lynch, Salomon Smith Barney and the rest hit the headlines ...

Meanwhile — as stock after stock fell during three long years of terrible markets — I led my clients to investments that DOUBLED ... TRIPLED ... and even SOARED up to 307%.

Now, in 2003, the worst panic of all is about to impact the U.S. economy and stock markets.

Please — for your own sake:

Do NOT ignore THIS final warning!

Dear In City

Martin D. Weiss, Ph.D. insulated his clients' money from the tech wreck of 2000 ... the earnings scandals of 2001 ... the brokerage outrages of 2002 ... and guided them to investments that soared 99% ... 144% ... up to 307% in the last year.

Prescription Roulette

In the next 12 months, one in every 380 Americans — a startling 780,000 of us — will be KILLED OUTRIGHT by a medical treatment the U.S. government tells us is "SAFE and EFFECTIVE"

Next time you take a prescription, ask yourself:

"Do I Feel Lucky?"

In this urgent bulletin:

■ 19 PRESCRIPTION DRUG TIME-BOMBS: Are you taking any of these potentially deadly prescriptions? Page 6, INSIDE

■ This arthritis drug caused up to 100,000 fatal heart attacks — what to take instead: Page 3, INSIDE!

■ This popular blood pressure drug makes you FIVE TIMES more likely to have a heart attack what to take instead: Page 8, INSIDE!

■ This hormone drug causes ovarian cancer in more than ONE-THIRD of all laboratory subjects tested — what to take instead: Page 10, INSIDE!

■ These anti-depressants are blamed for suicides — what to take instead: Page 10, INSIDE!

■ MUCH MORE LIFE-SAVING NEWS INSIDE!

If you follow doctors' orders and are over 60, there's a 60% chance that you will be the VICTIM of a medical or surgical disaster.

Arthritis drugs Vioxx[®] and Bextra[®] turned out to be savage killers before they were finally yanked from the market for causing heart attacks...

Antidepressant drugs Zoloft", Paxil", Luvox" and Wellbutrin" are supposed to LIFT your mood—not INCREASE risk of suicide...

Hormone replacement drugs such as Prempro* are suppose to SAVE women's lives—not DOUBLE your risk of breast cancer...

Thousands used Lamisil[®] to get rid of toenail fungus—and are now dealing with a "side effect" of fatal liver damage...

And folks using a popular drug used to stimulate their sex life—are losing their eyesight and dropping dead from heart attacks... The facts are ugly: This year and every year...

▶ More than 8.9 million Americans are victims of UNNECESSARY HOSPI-TALIZATION... and hundreds-ofthousands of them will contract dangerous infections... and 88,000 will be killed by them—simply because they followed "doctors' orders"...

▶ Americans will be scarred by more than 7.5 million UNNECESSARY SURGERIES... and as many as 69,136 of them will die on the table—or from complications later on...

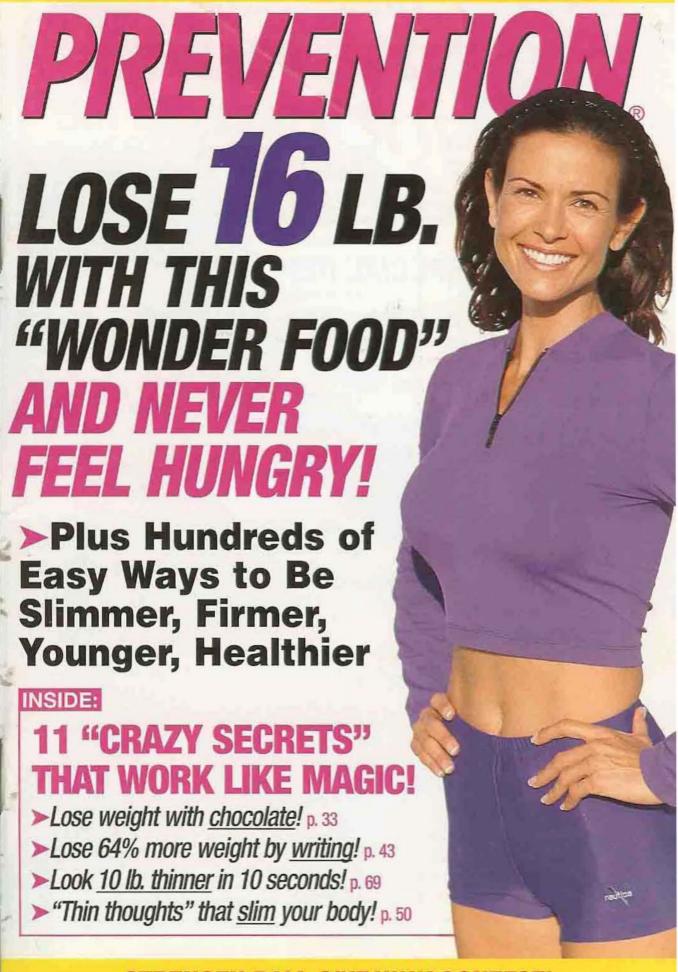

More than 106,000 will die in the hospital after receiving a doctorprescribed drug...

▶ 98,000 will be the victims of a medical blunder or malpractice...

 And another 422,800 will die from inhospital adverse medication reactions, bedsores, malnutrition, plus other

Every dime Limest is my future. So I don't take

Every dime I invest is my future. So I don't take it lightly. Like you, I'm keeping one eye on the Clinton Administration and one hand on my wallet.

I've worked hard to get where I am. Just the thought of getting blind-sided gives me the chills. I don't need higher taxes, a bank failure, insurance company bankruptcy or risky investments messing up my retirement. And I'm sure you feel the same.

Years ago I discovered that I was being led down a dangerous path by the very same people who

Recovery Dying

- Consumers: maxed out
- Money from tax cuts: spent 🥦
- Cash from refinancing: drying up
- Stock market: turning sharply lower!

The American economic recovery — born in Washington in 2002, nurtured on Wall Street in 2003, and expected to take off in 2004 — is dving.

In June, less than half the expected jobs were created. Two major retailers, Wal-Mart and Target, told Wall Street to ratchet down expectations because of sluggish sales. The Chicago Purchasing Managers' survey dropped sharply from 68 to 56.4. Housing starts plunged 8.5%. Sales at big auto companies fell off a cliff, despite aggressive rebates and sales incentives. Nearly every sector of the economy went limp.

Fed Chairman Greenspan said it was just "a soft patch" in the economy, and that the recovery would soon be back on track. But since then, we've seen nothing of the kind. Consumer confidence has just plunged. Retail sales growth is now the lowest in 13 months. And an index that tracks inventories is the worst since May 1994. Meanwhile ...

New jobs in July, which Wall Street expected would be somewhere between 215,000 and 300,000, turned out to be only 32,000.

In the auto industry, dealers have been swimming in a glut of cars, minivans, and pickups, with over three and half million vehicles sitting unsold on dealer lots, 8.9% higher than the same time last year.

In the housing market, mortgage refinancings, the single greatest source of cash for consumers, have plunged by more than 80% from last year's peak. Existing home sales fell 2.9% in July. New home sales plunged 6.4%.

Seven Scary Screw-Ups Doctors Make – And How to Avoid Each One

There's a 2-in-3 chance <u>your</u> life could be shattered by a doctor's careless error. Here's how to make sure you NEVER become one of conventional medicine's countless victims...

Dear Friend.

No one should ever, EVER have to go through what these innocent victims of sloppy, rushed, non-caring medicine have suffered...

Linda M. was told she had breast cancer after her doctor saw a suspicious spot on her mammogram. He ran some tests, which confirmed the disease, and urged her to undergo immediate surgery.

Two days after having a double mastectomy, Linda was faced with an even bigger shock: the pathologist had mixed up her test results with those of another woman. She ended up having two perfectly healthy breasts needlessly amputated.

Why?

Because a busy doctor didn't take the 10 seconds required to correctly match her paperwork with her biopsy slide!

Think that's bad? Then wait till you read what happened to Hurshall R.

Four Great Events dominated the last 10 decades:
World Wars I and II, The Depression, and the Fall of Communism.
Now "The First Great War" of the 21st century has changed the investment climate forever. Find out what it means to you inside...

f you take the time to read this information, you will come to understand facts that could quite literally change the quality of your life. Truly outstanding profit opportunities occur only rarely. They generally come about when two or more bullish factors converge. The better they are, the more infrequent they are. The highest potential for profit exists when a number of primary causes come together as is the case with silver today. At least eight major bullish factors have converged to set the stage for a possible percentage gain of extraordinary magnitude. There has never been anything like it with any other commodity or asset in history.

The silver story has yet to come to the attention of the public. Most Americans don't realize how truly important silver is to industry and how strong the demand is. Nor do they know that the U.S. government, which had almost 6 billion ounces of silver in 1942, will run out of silver this year. Even the national defense stockpile is gone. And most of all, they don't know that the current shortage of silver is greater than the known world supply. There is not going to be enough silver to go around.

A FREE \$59 BOOK FROM THE WORLDS FOREMOST SILVER EXPERT

We doubt that anyone in the world knows more about silver than silver analyst, Theodore Butler. Our company pays Mr. Butler a large fee to write monthly reports about silver. Mr. Butler is a former commodities broker for a major New York firm. He was the first analyst to sharply criticize silver and gold leasing. He makes a powerfully bullish case for silver. He claims there will never be a better profit opportunity with so little risk than there is with silver today. His books and reports are full of amazing facts and details. We'd like to send you his \$59 book at no cost, along with our hard-hitting monthly newsletter on economics and the markets free of charge. They're easy to read and highly entertaining.

SENSATIONAL SILVER

The first thing to understand about silver is that it is close to a 5,000 year inflation-adjusted low price. On top of that, over 90% of all the silver that's been mined in the past 5,000 years has been used up by industry and is gone forever. The amount of silver being used up is phenomenal. Today world silver inventories are at the lowest point in 200 years. At the same time demand for silver is greater than ever. Most of the gold ever mined is still with us, but the silver is gone. Actually we are to the point where silver is scarcer than gold. That's right! There's ten times more gold in the known world supply than silver. That's because silver is consumed much more heavily by industry.

Consider these powerful facts. Each and every year the silver supply falls 150 million ounces short, or about 20% of industrial demand. That's why so much of the world's above ground supply is used up and gone. Shockingly enough, all the known and recorded silver in commodity warehouses and elsewhere

- * HOW you can USE the coming collapse to pile up more money than you made in the great boom of the 1990s with little-known investments that inevitably surge 211%... 501%... up to 929% and more in times like these!

If you owned Enron when it went belly-up last December, you lost 100% of your money.

But if you had owned the often-overlooked investments we're using, your \$25,000 investment would have handed you a \$232,250 PROFIT in as little as 42 days.

Here's why more US corporations will declare bankruptcy in the next 12 months than at any time since the Great Depression ...

Welcome to a Wide World of High Yields

Dear Investor;

If pulling down annual yields of 12%, 15% and more a year sounds good to you — before capital gains — take a look inside.

You'll see stocks yielding 15.7%... along mutual funds yielding 12.5%... along with high-yielding RETIs, trusts, partnerships, ETEs, preferred stocks, convertible preferreds... and a few strange investment creatures you probably never knew existed!

As you'll see in this Special Issue of High-Yield Investing, plenty of investors are racking up solid profits by focusing on companies that put shareholders first — by sharing their profits in the form of steadily increasing cash dividends.

I started this venture because there is a crying need for someone to spread the word about these dependable fortune builders. Millions of individual investors that should be in these vehicles are not — and they are losing out on billions in safe and steady profits.

These are our kind of companies, because they excel the old-fashioned way; by consistently running their businesses well. Give them a chance and these stocks can give you the

oes the endless string of Wall Street investment fads ever make you feel that you're missing something?

Well, please take a deep breath and relax. It's time to forget about the rocket scientists with their black boxes... the PhDs with their Greek formulas... and the high priests of Efficient Market Theory.

The most important investment decision you'll ever make pivots on something far more basic; how you treat the overlooked stepchild of Wall Street, the lowly dividend.

Although little respected and often ignored, more than 100 years of data point to the inescapable conclusion that owning hum-drum dividend-paying stocks... and then reinvesting those dividends... beats all other investment approaches hands down.

So if dividend-paying stocks make you yawn, it's time to wake up and smell the cash.

Your Choice: \$2.7 Million or \$100k?

Since 1926 dividends have contributed 42% of the total return delivered by the S&P 500. This makes a massive difference over the long haul. A \$1,000 investment in the S&P 500 in 1926 would be worth \$2,729,000 today with dividends reinvested, but a mere \$98,855 without the dividends.

Underestimating the awesome edge income-paying securities give you is the biggest mistake you can make in your investing life.

Higher Yields = Higher Safety, Too

A key reason that dividend-paying investments have clobbered the competition is because they fare so much better during bear markets.

Over the vicious three years of 2000, 2001 and 2002, the stocks in the S&P 500 that paid dividends actually rose 10.4%, while the non-payers sank -33.19%.

- GOVERNMENT CHAOS: Soaring budgets, skyrocketing deficits & Social Security cuts
- # CORPORATE CHAOS: Plummeting earnings, crashing pension plans & soaring bankruptcies
- PERSONAL CHAOS: Rising unemployment, pension & Social Security collapses and declining home values

What you MUST do NOW to GUARD what you've GOT ... and turn CHAOS into CASH in 2003!

You are now staring down the barrel of a financial apocalypse that will ...

- Slaughter the earnings of hundreds of the world's oldest and wealthiest banks...
- Smash hundreds of multi-national corporations and thousands of smaller companies to pieces...
- Level the economies of Japan, South Korea, Southeast Asia, Latin America, the European Common Market countries, and, yes, even the United States, and ...
- Trigger one of the greatest destructions of personal wealth in our lifetimes — driving the DOW to 5000, creaming the Nasdaq to 800, and cutting the value of your stocks by half or even more.

Sure — you're going to see explosive shortterm rallies from time to time. They're to be expected in a giant bear-market like this one. And unfortunately, these dramatic surges will here many desperately optimistic investors back into stocks.

And sure, Washington is now in an absolute panic to put a band-aid on the gaping head wounds of the economy, and convince you that Wall Street is safe again.

But if you count on Washington to bail you out, you're practically begging to get scalped—just like the millions of investors who got skinned for a staggering \$10.5 trillion from peak to trough in 2000-2002. TEN AND A HALF TRILLION DOLLARS IN LOSSES! That's as much as America's total GDP—the amount produced by every business, and every American—in a whole year!

The simple truth is, the bear market can NOT end ... the next bull market can NOT begin ... until there are no more hidden shocks waiting to ambush investors.

TECHNOLOGY INVESTING

JANUARY BULLETIN

Dear Reader,

That loud noise you heard from Wall Street was the sound of Trouble. Please, I beg you, don't try to "go it alone" just now.

That's why I'm rushing you this special Forecast edition of *Technology Investing* today.

Please review these projections carefully now. If they make sense, then please consider adding me to your investment team.

I launched *Technology Invest- ing* because I saw conservative investors taking huge risks in tech stocks. I wanted to show them how to invest in exciting companies—companies that are completely remapping America's future...

...Without Taking Insane Risks

The response has been gratifying. Not only has *Technology Investing* quickly established itself as the most successful advisory in its field, but our customers have become rich... very quickly (see my complete track record inside).

As you'll see in the following pages, the changes just about to break across the landscape are quite unexpected. They will take most investors completely by surprise, but offer the well-prepared a once-in-a-decade opportunity.

The next 12 months will be extraordinary. Read about them here, and join me at *Technology Investing* to profit highly from them.

Dr. David G. Williams' Alternatives SPECIAL INTRODUCTORY ISSUE

NEW HEALTH BREAKTHROUGHS FROM AROUND THE WORLD

The Colossal Cholesterol Mistake!

Please Accept This Special Issue With My Compliments

The information you're about to read is vital to your health and well-being. It may help you save about \$100 per month or more. But most important: It might even save your life. Here's how...

Doctors, the drug industry, health magazines, and supplement companies have launched a major new campaign against cho-lesterol. The reason? Their best efforts at halting heart disease in the U.S. have failed. It remains the nation's leading killer of men and women.

Public health officials have responded by changing the cholesterol guidelines and urging millions of Americans to go on drugs. You or someone you know could be one of these people.

But this could be a huge mistake! I've sent you this Special Issue of ALTERNATIVES so you will have the facts. For instance...

- High cholesterol DOESN'T cause heart disease. Page 4 tells what does.
- Most heart attacks occur in people with NORMAL cholesterol levels. See page 5.
- Cholesterol-lowering drugs WON'T prevent a heart attack. Worse: They can damage your heart for life, Page 5.
- The underlying <u>cause</u> of heart disease is going untreated and ignored by almost all doctors in the U.S.

The bottom line:

You are about to discover the only <u>proven</u> way to keep yourself safe from the epidemic of heart disease that remains incurable and unstoppable with the current approach.

Please give this matter your serious attention.

Dr. David G. Williams Founder and Editor by Dr. David G. Williams

n the weeks and months ahead you'll be hearing a lot of scary talk about cholesterol. Much of it will be aimed at getting more Americans to go on cholesterol-lowering drugs. You could be one of them—but it might be the biggest mistake of your life.

Soon, you could be one of the 24 million additional Americans who will be asked to shell out about \$100 every month for a cholesterol-lowering drug—even though they may not need it! WORSE: these drugs could actually give you a life-threatening heart condition that you might otherwise never, ever develop.

Even doctors are being fooled. They honestly believe these drugs are in your best interest. <u>But they are dead wrong!</u> Here's what you must know to keep yourself or a loved one safe. . .

JUST RELEASED: The astonishing NEW forecast and warning from MARTIN D. WEISS, Ph.D. — the investment prophet who correctly warned you about the stock market crash of 2000-02 SIX MONTHS IN ADVANCE:

Grab gains of up to 562% in The Great Federal DEBT EXPLOSION of 2004-2005!

The specter of \$1-TRILLION deficits - with no end in sight - has ALREADY helped...

- Launch long-term INTEREST RATES up 23% higher...
- Trigger the most severe BOND MARKET CRASH in 17 years...
- Smash THE U.S. DOLLAR down as much as 30% against the euro, the pound and the yen, and...
 - Relaunch producer price INFLATION to its highest levels since 2000.

Inside this urgent, all-new update from Dr. Weiss:

- >> Four critical steps you MUST take NOW to insulate your wealth from the great federal debt EXPLOSION of 2004-2005, and...
- >> Investments that can soar as much as 562% and potentially MAKE YOU UP TO SIX TIMES RICHER as Washington accelerates the greatest spending spree in history!

Dear fellow investor:

gnore this sober warning, and you may as well take your savings ... your retirement — and your very financial security — and KISS THEM GOOD-BYE.

On the other hand, if you HEED the warning in these pages — and ACT on the advice I offer you in this urgent report, not only will you have plenty of time to insulate your wealth ...

... you'll have the opportunity

to rake in gains of up to 562% in 2004-2005!

It's no secret that our government is bleeding the greatest gusher of red ink in history. And no institution on Earth — not the White House, not Congress ... not the Treasury or Federal Reserve has the faintest hope of slowing it — let alone STOPPING it.

Despite what politicians of both parties may try to tell you, the undeniable truth is that Washington, D.C. has LOST CONTROL of the federal budget.

By conservative estimates, the budget deficit will top \$500 billion in 2004. But that number is based on the kind of phony-baloney accounting tricks only the U.S. government can get away with. If you use the kind of accounting rules you and I are required to use — the REAL deficit is going to be more. Much, MUCH more!

HOW much more? There's only

Dear Fellow Investor:

You can't say I didn't warn you.

Since January 1999, I mailed more than 15,604,217 letters and special reports warning investors of the Wall Street disasters:

"Greedy brokers, stock analysts, and CEOs are ROBBING YOU BLIND," I wrote.

"Most of those glowingly upbeat stock ratings assigned by analysts at big brokerages are pure BALONEY — and if you trust them, you're sure to get skinned alive," I said.

I warned that record numbers of corporate CEOs are shamelessly exaggerating their earnings — and if you own their stocks when they get caught, you're going to lose a fortune.

And then, I went even further... I pleaded. I even nagged you to send for a FREE copy of my Total Protection Package for Cautious Investors — including \$307 worth of indispensable investing guides:

The Second discovery...More Alegan Saudi Arabia:

Possibly one of the world's all-time great oil discoveries — MULTIPLE Saudi-sized oil fields — in Nevada and Utah! Sometimes truth IS stranger than fiction. Yes, it sounds crazy

Aviv-Y lerusa

Elat-

The oil-rich Cordillera runs from Alaska to Mexico

- but no crazier than when geologist Chuck Fipke claimed 15 years ago there were diamonds in the Canadian Arctic. CRAZY! (P.S. Canada is now the world's 5th largest diamond producer. Early investors' shares shot up over 20,000%. Many became almost instant millionaires.)

EAST FORWARD TO 2005:

Another "crazy" geologist believes that central Nevada and Utah hold some of the world's greatest oil reserves, equaling or exceeding all the riches of Saudi Arabia. Dr. Alan Chamberlain spent 20+ years studying the area, and what he has already found is astonishing. Is he "crazy" like Chuck Fipke? Consider these facts...

 The first drilling location was a bulls-eye-with a billion barrel oil field just announced by private Wolverine Gas

- & Oil. New drilling is already underway.
- The Mideast's colossal Gachsaran and Rag-Sefid oil fields (pumping 730,000 barrels a DAY) have an almost exact geological 'twin' - in central Nevada and Utah.
- · Oil oozes from the ground. It's in the water...collects in puddles...contaminates the soil. What does it mean?
- Eden Energy (EDNE) has acquired 210,000 acres at the epicenter of this hydrocarbon hotspot in central Nevada. Pre-drilling preparations now under way.

NOW ASK YOURSELF:

- · Has Dr. Chamberlain found a cluster of 'elephants' to equal Iran, Iraq or Saudi Arabia's total reserves?
- Will Eden's first well exceed Wolverine's success?
- Will Eden create the kind of wealth for early investors that Chuck Fipke did a few

New Warning About "Healthy" Vitamins That Can Trigger Hypertension, Strokes & Cancer

Experts warn of hidden health risks of popular vitamins taken every day.

FOR IMMEDIATE RELEASE—

"Loss of sensory and motor control...Blood clots, phlebitis, hypertension, severe fatigue, breast tumors and disturbances in the reproductive system." Believe it or not, these are some of the possible side effects of taking some of today's most popular vitamins and minerals. In fact, most of these vitamins are found in popular multivitamin formulas that the public considers harmless. Well, as it turns out,

these vitamins are NOT the harmless, health enhancers many believe them to be.

Taken in the wrong quantities, certain common vitamins can often do far more harm than good. They can leave you with a chronic health condition...or even contribute to deadly disease.

That's why the latest edition of the 2-million copy best-seller THE BIG BLACK BOOK, is going public

with the "dirty little vitamin secrets" the manufacturers don't want you to know.

Amidst a loud outcry from the vitamin industry lobby, THE BIG BLACK BOOK is releasing secrets reserved only for highechelon executives, insiders and politicians.

"Industry insiders have always hated THE BIG BLACK BOOK," says Martin Edelston, the publisher. "And I can understand it... after all, we reveal secrets the public is never supposed to see. That's bad for big business ...but great for our readers. That's why we've sold over 2 million copies to date.

"This vitamin scoop is particularly important," says Mr. Edelston. "Millions of people take these vitamins every day...then they go to the doctor and discover they have developed a dangerous new condition. It's got to stop!

"On page 73 in THE BIG
BLACK BOOK, we give our
readers a complete list of
the hazardous vitamins
and dosages that can
damage your health.
You won't hear this from
your doctor. You won't see it
on TV. You'll find complete details in
your FREE preview edition of THE BIG
BLACK BOOK."

Editor's note: To claim a free preview copy of the new edition of THE BIG BLACK BOOK, please detach and mail the reply card between pages 14 & 15 of this issue.

Readers should note there is no purchase obligation associated with this invitation. The publisher has generously offered to lift all the typical obligations you might expect from an offer such as this.

BIG BLACK BOOK Makes Donn Hecht \$10,000 Richer In One Hour

2 Million Americans Now Swear By This "Underground Encyclopedia."

BY MARTIN EDELSTON PUBLISHER, BOTTOM LINE BOOKS

STAMFORD, CT—Sixty minutes after Donn Hecht of Miami, FL, lifted the cover of THE BIG BLACK BOOK, he learned a secret that made him \$10,000 richer.

Richard Coyle of Fairfield Bay, AR, saved "hundreds of dollars" just a few hours after he began reading THE BIG BLACK BOOK.

K. Amin of Miami, FL, turned to THE BIG BLACK BOOK before he bought a new car. The result? "...through the step-by-step guidelines (I) was able to save \$2,400." And this is just a small sample of what America's most successful people are saying about THE BIG BLACK BOOK.

Why? Because it reveals hidden trade secrets and off-limits industry facts that let you work the system like never before.

And when you know—and I mean really know—how to work the system, the rewards are simply astronomical. All of a sudden, the windows of opportunity fly open as if a hurricane were passing through.

The Insider Advantage!

For instance: If you knew how to work the stock market like an insider (instructions on page 380 in THE BIG BLACK BOOK), you'd know how to buy IPOs at insider prices before they go public. The result? You could easily multiply your money 5–10 times over in only months!

If you knew how to work the tax system, you could legally collect

MARKETWATCH

Letting the Cat Out of the Bag

Dear Friend,

How many junk mail and email pitches do you get each day promising you the secret to wealth in exchange for a few hundred bucks on up to several thousand dollars?

If these schemes really worked as advertised, the writers would be idiots to reveal them. Why settle for selling a few measly subscriptions—even at \$5k a pop—when you can run your own money and amass a huge fortune instead?

I've been around most of the guys who dream up these hare-brained schemes, and I've known many of the writers who were copyboys not long ago and now are vaulted supreme editors of the printed or online advisories. I also know most of these guys never really worked the markets for real—day in and day out for any length of time.

Instead, they learned it's much easier to make a buck telling a story. And it doesn't even have to be a good story or even true (thanks to the First Amendment).

We Sleep Well At Night Knowing You Can, Too

PLUS...

- How not to get duped by Wall Street and grow up to 800% richer
- Three megatrends that can make you a millionaire by the time President Bush leaves office
- The death of indexing—and where you'll pile up your fortune *instead*

By Neil George, Editor, Personal Finance

o matter where you stand politically, President George W. Bush's next term will have a major impact on your investments. And you could wind up considerably richer or poorer four years from now...depending on what you do NOW.

That's because as President Bush strives to leave his mark—with the added benefit of a Republican-controlled Congress—many sweeping changes may be in store. Some spell a potential profit bonanza for investors.

For starters, *more* investor-friendly tax changes, an industry-friendly energy bill, and a major over-haul of Social Security and Medicare could offer a wealth of opportunities if you align your portfolio with the *right* companies and sectors.

But that doesn't mean it will *all* be smooth sailing. Because even

though the presidential election is behind us, there's still plenty of uncertainty ahead to keep the market in a sideways-moving funk through the end of Bush's second term and beyond.

We're still coping with staggering budget deficits, federal revenues at their lowest level as a share of the economy in half a century, intense spending pressure for defense and homeland security, a mess in Iraq with no happy ending in sight, a frenzied rollercoaster ride with oil and energy prices, and serious security threats across the globe.

3 Profitable Rules for Investing in a Sideways-Moving Market

Revealed Inside: A simple remedy that helps you put an end to your most painful and embarrassing digestive difficulties!

Bob Livingston Letter Winter 2007 Special Introductory Issue Five Dollars **SHOCKING NEWS, REVEALED INSIDE:** 16 Bald-Faced LIES That Can Destroy Your Health & Wealth in 2007 (But discover the truth, and live independently healthy and wealthy!) The "Statin" Drug Death Sentence! If you are to believe doctors, drug companies, and TV and print ads, "statin" drugs Lare a lifesaver for those struggling with high cholesterol. After all, they tell you, statin drugs are clinically proven to reduce your "bad" LDL cholesterol by 30 to 50 percent—thus slashing your risk of crippling heart disease, fatal heart attack, or stroke. Sounds like a medical miracle, right? NOT SO FAST! The truth behind the headlines paints a much darker, deadlier picture. The fact is, in the long run, statin drugs reduce the synthesis of a key nutrient your body must have, making you more susceptible to heart failure, not to mention liver problems, muscle wasting, dementia, cataracts, and even cancer. So the very cholesterol-lowering drugs 13 million Americans are taking every day for the rest of their lives (and 39 million Americans will take, based on new cholesterol "guidelines") can actually be a death sentence! **Deadly cover-up** Worse, big drug companies have known for more than 16 years that statin drugs cause this deadly nutritional deficiency—and have hidden it from the public and medical doctors. Why? For one simple reason: GREED! Statin drugs are a \$20 billion a year business. Inside, this outrageous cover-up is exposed at last, along with powerful new secrets for lowering your cholesterol without statins... (see page 3)
